If possible do a complete clean weekly, weather permitting. Fitting in with green requirements. During leaf / bud fall please ring me if you have problems. Best technique is to blow into ditches and suck up. Fill in log book it helps to know what has been done and when. Phone me if problems arise.023 92592892 or 07905329533

Hints for use of equipment

Proweave vac brush. Setting on two clicks, lift back off ground for ease of adjustment. DO NOT USE IF WET.

Hand held vacs. Empty bags before and after use. Ring me if they stop working efficiently during use. Do not dismantle unless you are sure how to do it!! Mind the disc markers the machine will eat them!!

Try and clean surrounds, blow and vac. It stops bits blowing onto green.

Pump sprayers and long brushes for bird poo. Fill with water and a DROP of detergent.

Many thanks for your help, which ensures we have a green that is the envy of many clubs. It is also used as a sales demonstration by Dales. This is only because you really look after our playing surface and its surrounds. Well done.
